

# Very Narrow Aisle(VNA)

## Racking System

**Plan View**

**Side Elevation**

This system maintains the essential 100% accessibility and outstanding goods protection feature to ensure quick picking rate and flawless stock rotation with the narrowest aisle.

Hitech's VNA System is designed carefully with no compromise on durability and safety. It features aisles that are marginally yet sufficiently wider than the loads, making full use of roof height to create ultimate storage capacity for space-concerned customers.

VNA forklift truck equipment that comes with either man-up or man-down cabins that are capable of reaching higher beam levels are used in this exceptionally competent system.
